

PollSlide for PowerPoint

Live polls, quizzes & surveys — right inside your slides.

Windows

Mac

Web

THE PROBLEM

Audiences tune out — and presenters can't install anything.

Passive audiences

One-way slides lose the room.
Engagement and recall fall off fast
without interaction.

Borrowed computers

Conferences and classrooms run
off an onsite PC. The presenter
arrives with a deck on a USB stick
— nothing is installed.

No-install reality

You can't sideload a companion
app on a locked-down machine
minutes before you present.

PollSlide needed a way to work on ANY PowerPoint, with nothing pre-installed.

THE SOLUTION

One Office Add-in. Every PowerPoint.

Office.js add-ins run inside PowerPoint on Windows, Mac and the web — from a single codebase.

No companion app to install.

- 1 Insert from the ribbon**
Add PollSlide once from AppSource; it's there on any signed-in copy of PowerPoint.
- 2 Audience answers on any phone**
A QR code / link on the slide — no app, no login for participants.
- 3 Results live on the slide**
Votes, quiz scores and survey responses update in real time in the task pane.

RUNS NATIVELY IN

 **PowerPoint · Windows**

 **PowerPoint · Mac**

 **PowerPoint on the web**

HOW IT WORKS

Three steps, zero friction

1

Insert the poll

From the PollSlide panel, pick a question and click Insert QR — the code drops onto your slide.

2

Audience responds

Attendees scan with any phone camera and answer instantly — no app, no account.

3

Watch it live

Bars, leaderboards and survey results update in the task pane as answers arrive.

The presenter never leaves PowerPoint. The audience never installs anything.

Live results, in the PowerPoint task pane

What the presenter sees, docked beside their slides:

- Real-time vote bars & %
- Quiz reveal with a countdown
- QR + answer link, one click to insert
- Leaderboards, word clouds, ratings
- Survey & study modes in the same panel

CROSS-PLATFORM

One submission, every surface

Capability	Win	Mac	Web
Task pane add-in (Office.js)	✓	✓	✓
Insert QR onto a slide	✓	✓	✓
Live results in the pane	✓	✓	✓
Auto-detect poll slides	✓	✓	—
Audience answers on phone	✓	✓	✓
No install on the host PC*	✓	✓	✓

** Added once from AppSource to a signed-in account; available on any copy of PowerPoint the presenter opens.*

BUILT RIGHT

Secure, private, store-ready

Standard Office.js

Task-pane add-in using only public Office.js APIs. Requests the minimum ReadWriteDocument permission (to insert a QR image).

Privacy first

Participants answer anonymously by default — no personal data required. Hosted on Google Firebase; nothing is sold or shared. Privacy policy & EULA published.

Resilient

Slide auto-detection degrades gracefully; if a host lacks an API, the manual flow still works. HTTPS throughout; CSP-friendly.

Accessible & themed

Keyboard-navigable, high-contrast UI with light/dark support, sized for the PowerPoint task pane.

APP NAME

PollSlide for Powerpoint— PollSlide — Live Polls, Quizzes & Surveys

SHORT DESCRIPTION

Run live polls, quizzes and surveys inside PowerPoint. Your audience answers on any phone by scanning a QR code — no app, no account. Results update on your slide as they come in.

CATEGORIES

Productivity · Education · Presentations

SUPPORT / PRIVACY

pollslide.com/setup · pollslide.com/privacy

LONG DESCRIPTION

PollSlide turns a PowerPoint deck into a two-way conversation.

Insert a poll, quiz or survey into your slides. Your audience scans a QR code or types a short code at pollslide.com/join — nothing to install, no account to create, works on any phone. Answers arrive live and the results update on your slide while you present.

What you can do

- Live polls, multiple-choice quizzes, open text, word clouds and rating scales
- Show live results as they arrive, or show only who has responded so answers stay independent until you reveal
- Score quizzes automatically, with a leaderboard and a reveal
- Insert a QR code straight onto any slide
- Works in PowerPoint on Windows, Mac and the web

Who it is for Teachers checking a class has understood, trainers keeping a room awake, and anyone who has ever asked "any questions?" to silence.

FOR THE MICROSOFT VALIDATOR

How to test in 60 seconds

TEST ACCOUNT

Email:

appsource-review@pollslide.com

Password:

12345678

Manifest:

powerpoint-manifest.xml

Source:

app.pollslide.com/powerpoint

Hosts:

Presentation (PowerPoint)

STEPS

- 1 Open PowerPoint → Home → Live Results (PollSlide).
- 2 Sign in with the test account above.
- 3 Pick “Reviewer Demo”, choose a question → Insert QR.
- 4 Scan the QR (or open the shown link) and submit an answer.
- 5 Watch the bar update live in the task pane.

Ready for review

One add-in that makes every PowerPoint interactive — on whatever computer the presenter walks up to.

Cross-platform (Win/Mac/Web)

Minimal permissions, privacy-first

Free tier — instant adoption
