

PollSlide LIVE — Results on Your Slide

Notes for certification · PollSlide Technologies LLC (Wyoming, USA) · help@pollslide.com

PollSlide LIVE is a PowerPoint CONTENT add-in: it is inserted onto a slide and shows live audience results there, including during Slide Show.

GETTING AN ACCOUNT

This is NOT an enterprise-only add-in. Any individual can create a free account at app.pollslide.com/presenter in about a minute — no enterprise purchase, licence key or administrator provisioning, and no credit card for the free plan. Optional paid plans raise limits. The add-in says this on its first screen. Support: help@pollslide.com · <https://pollslide.com/powerpoint-live>

FIRST RUN

In editing view the object explains what it does and offers sign-in. During Slide Show it shows results only, with no sign-in prompt: results are readable without an account, and a login box on a slide in front of an audience would not be usable.

TEST ACCOUNT

Email: appsource-review@pollslide.com

Password: 12345678

The account contains a presentation named "Reviewer Demo" with questions.

HOW TO TEST (about 2 minutes) — PowerPoint on the web is quickest

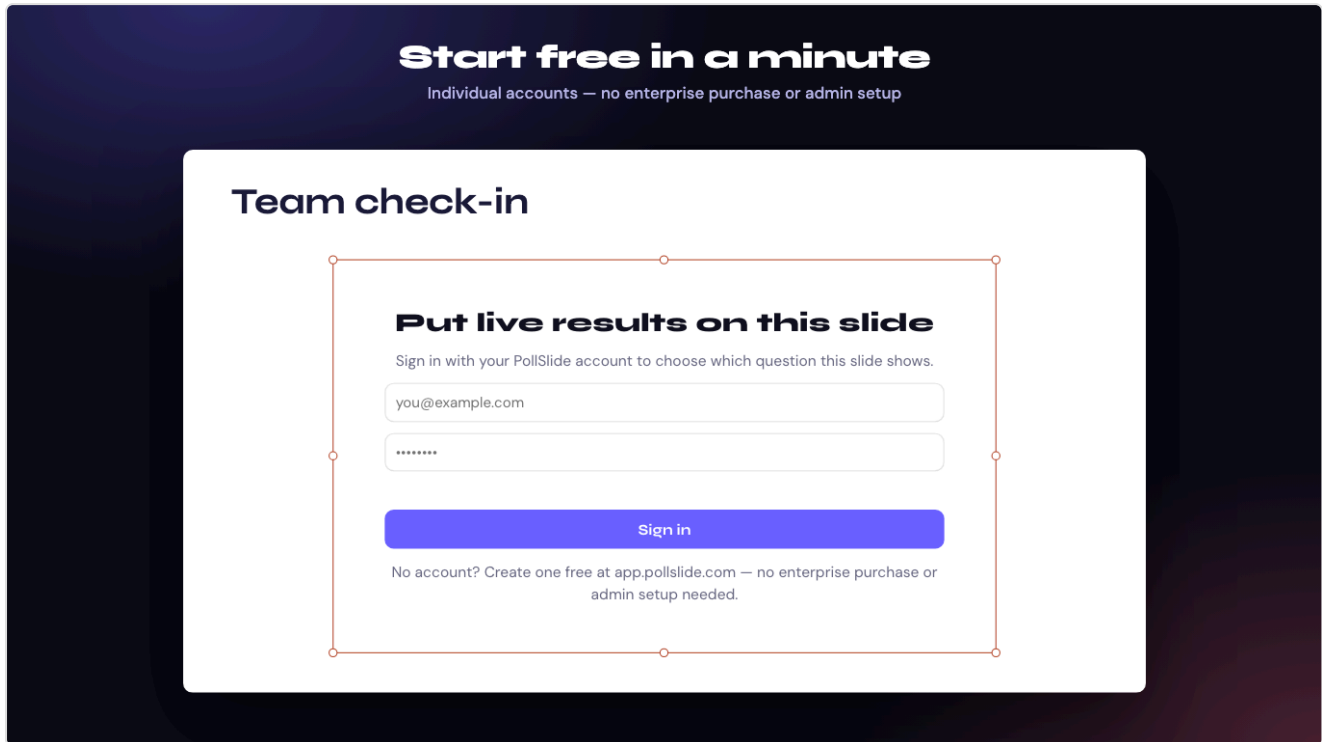

1. Insert > Add-ins > My Add-ins > PollSlide LIVE. It is inserted ONTO the slide as an object (not a task pane).
2. Click the object and sign in with the test account above.
3. Choose "Reviewer Demo", then any multiple-choice question.
4. To answer as the audience: open <https://app.pollslide.com/presenter> in another browser tab (same test account), open "Reviewer Demo", and open the question's live view — it shows the QR code and the answer link. Open that link (or scan the QR with a phone) and submit an answer.
5. The count and bars on the slide update within a second or two.
6. Start the Slide Show — the object keeps showing and updating the results.

Support: help@pollslide.com

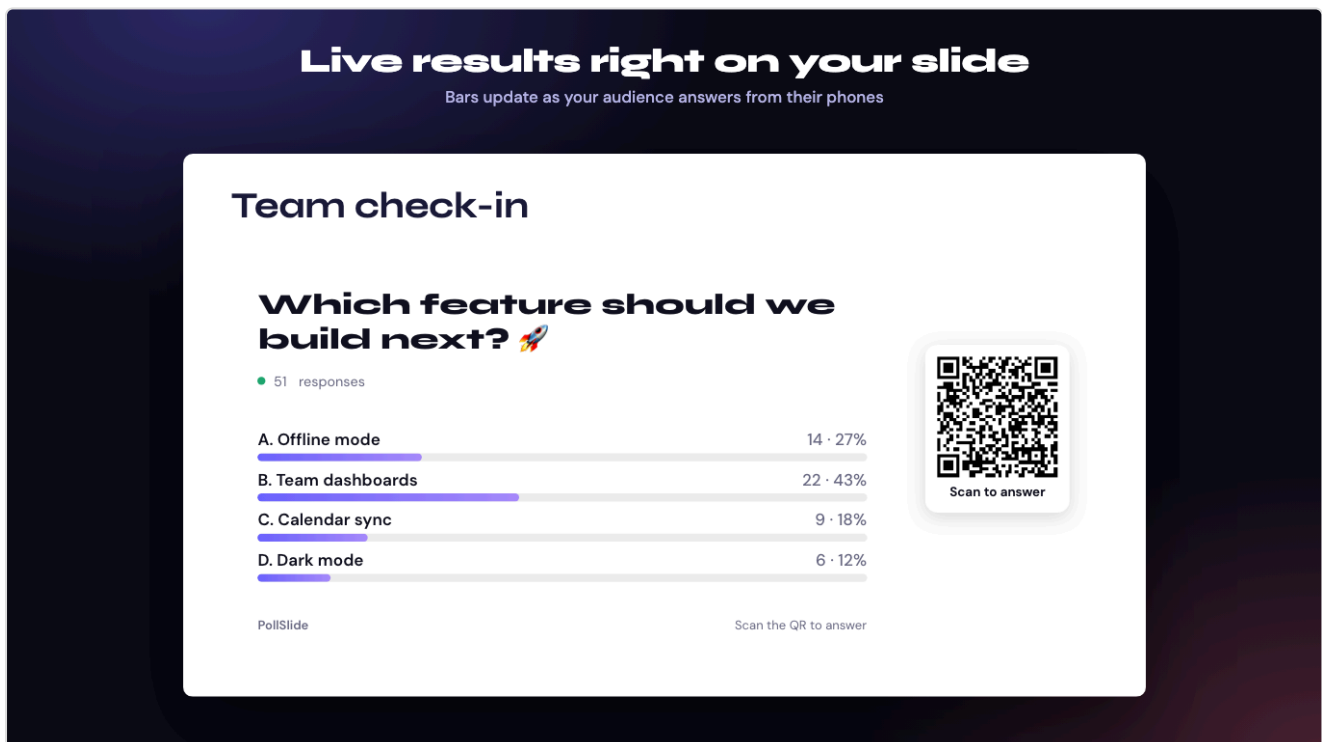

LANGUAGES

The listing is offered in English, Spanish (es-ES), German (de-DE), French (fr-FR), Portuguese (pt-PT) and Italian (it-IT). The add-in's own interface follows PowerPoint's display language (Office.context.displayLanguage) in those five languages and uses English for any other. The presenter's questions and answers are their own content and are shown as written.

WHAT YOU SHOULD SEE

Editing view, first run: explains what it does, says how to get a free account, then offers sign-in.

Linked to a multiple-choice question: bars update as the audience answers from their phones.

Keeps running while you present

Reveal the answer on a countdown or with one click

Quick quiz

During Slide Show: results keep updating; the answer can be revealed on a countdown or with one click.

Polls, quizzes, word clouds and ratings

A different question on every slide

Your turn
